

Capability Statement

Core Competencies

CM Technology Inc. (CMT) is a leading global service provider of satellite communication solutions. CMT offers a wide range of services, including teleport site design and construction, LEO tracking antenna systems, antenna installation and maintenance services, teleport lease agreements, program management. Additionally, CMT is a factory-certified reseller of Cobham Seatel antenna systems and Furuno products.

Core Capabilities:

- Extensive knowledge and expertise in LEO tracking antenna systems.
- Provider of custom turn-key satellite ground communication solutions.
- Comprehensive knowledge and experience managing ground station operations, including satellite command and control, data processing and storage, and telemetry tracking.
- Proficiency in designing, developing, and operating satellite communication systems.

Differentiators

CMT expertise in providing customized satellite solutions tailored to the specific needs of targeted agencies sets us apart from competitors and ensures that clients receive high-quality and reliable communication services that maximize operational capabilities.

- Offering the latest and most advanced satellite technology, CMT customers benefit from increased system performance, and faster data transmission rates, which are essential for mission-critical operations.
- Providing cost-effective satellite services and solutions, CMT clients benefit from reduced costs, improve allocation of resources, and effectively meet core mission objectives.
- By leveraging the expertise of a highly skilled satellite team, CMT clients benefit from efficient project planning and execution, resulting in successful project outcomes and timely service execution.

Past Performance

- OneWeb: \$9.12M -10yr contract-Build and maintain satellite access portal in Petrolina, Brazil-(14) 3.7m LEO tracking antennas in operation.
 - Joe Paciaroni-Director, Gateway Director- jpaciaroni@oneweb.net
+1-303-961-0588
- Tyvak: \$246k-Sale Tracker 3700 antenna-Abu Dhabi antenna installation-3.7m successfully installed, commissioned, and in operation.
 - Chris Shaffer-Mission Operations Lead Chris.Shaffer@tyvak.com
+1-949-344-6157
- Knight Sky: \$103k (1) 6012 Ku Band Antenna with installation
 - George Knizewski, CEO- George.knizewski@knight-sky.com

Company Data

CM Technology Inc. (CMT) was established in 2012 in Cheyenne, Wyoming. The main office is in Surry, Virginia. As a certified HUBZone member, the company provides satellite communication solutions to clients globally.

- Satellite Teleport Construction
- LEO/MEO Tracking Antennas
- Installation and Maintenance
- Program Management
- Teleport Lease Agreements
- Maritime RADAR Systems
- Network Operations Center
- Telemetry, Tracking, and Command
